**Filed** : **Herewith**

**Amendments to the Claims:**

This listing of claims, in which Claims 2-10 are canceled, will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. **(Original)** A pump attachment for a container defining a neck, comprising:  
a body defining an elongate chamber having a first end, a second end and an interior wall extending between said first end and said second end;  
a coupler sized and shaped to secure said body to a neck of a container;  
a shaft extending through an opening in said first end of said chamber, said shaft defining an internal flow channel;  
a one-piece piston reciprocally mounted within said chamber, said piston defining an inner annular surface surrounding said shaft and an upper outer annular surface sized and shaped to form a sealing engagement with said interior wall of said body and a lower outer annular surface sized and shaped to form a sealing engagement with said interior wall of said body, said piston separating said chamber into an upper portion above said piston and a lower portion below said piston;  
an inlet valve at said second end of said body, configured to permit the flow of fluid into said chamber and restrict the flow of fluid out of said chamber; and  
a biasing member between said piston and said first end of said chamber, wherein said attachment further defines a first sealing surface substantially fixed with respect to said piston and a second sealing surface substantially fixed with respect to said shaft, said first sealing surface and said second sealing surface having a first position wherein said first sealing surface and said second sealing surface cooperate to prevent the flow of liquid between said piston and said shaft and a second position wherein said first sealing surface and said second sealing surface permit the flow of liquid between said piston and said shaft.
- 2-10. **(Canceled)**
